### **DETAILED ACTION**

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I, e.g. claims 1-5: A semiconductor integrated circuit including a first and second fuse elements.

- Species II, e.g. claims 6-10: A semiconductor integrated circuit including a single fuse element.

- Species III, e.g. claims 11-15: A semiconductor integrated circuit including an internal circuit having first , second and third external terminals.

- Species IV, e.g. claims 16-20: A semiconductor integrated circuit including a digital circuit having a first external terminal, and an analog circuit having a second external terminal.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan H. Nguyen whose telephone number is 571-272-1694. The examiner can normally be reached on 9AM-5:30PM.
